DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Claims 27 and 28 are rejected under 35 U.S.C. 102 (e) as being anticipated by Machii et al. (US 6324467B1).

With respect to claim 27, Machii et al. directs to service system from a server side (1302) that communicates with a terminal (1306). The server provides the terminal with a map in accordance with a request made by the terminal (Machii et al., figure 1; column 5, lines 18-25, lines 34-37). The member ID (502) and the terminal location are transmitted to the server (1302). The server side comprises a routing system configured to receive, from the terminal, a request for routing from a first location to a second location (Machii et al., column 11, lines 34-49). Based on the received member ID and the vehicle position, the server (1302) transmits a route map to the terminal for user to travel from a location to a destination (Machii et al., column 14, lines 60-67).

As to claim 28, the terminal (1306) is mounted on and is used for providing a route guide showing directions to a destination. Said terminal receives the GPS satellite

(1307) (Machii et al., figure 13, and the associated text in column 5, lines 15-25). The terminal (1306) stores the member ID (Machii et al., column 9, lines 53 and 54). As mentioned above, the data is transmitted from the terminal side to the server side using a communication device (Machii et al., figure 4).

Allowable Subject Matter

The examiner has found none of the references has been found discloses or suggests the limitations as recited in claim 1. Claims 1, 4-7, 10-12, 15, 16, 19, 20, and 26 are now allowable.

Response to Arguments

Applicant's arguments, see the applicant's amendment and arguments, filed 10/27/2006, with respect to claims 1, 4-7, 10-12, 15, 16, 19, 20, and 26 have been fully considered and are persuasive. The previous 102(a) rejection has been withdrawn.

The new added claims 27 and 28 are rejected based on the reference of Machii et al. (US 6324467B1).

Conclusions

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
